A cross-sectional view of a device. It features a central core with two horizontal layers, both labeled 1065. The top layer is slightly offset to the left. To the right of these layers is a vertical section labeled 1060. Two diagonal lines, one from the top-left and one from the bottom-left, meet at a point on the right side of the core. A dashed vertical line, labeled 1070, is positioned to the right of the core, with arrows pointing towards it from both the top and bottom diagonal lines.
